

Substance Abuse Connect is an effective, vision-driven, action-oriented substance abuse and behavioral health coalition, inclusive of prevention, treatment and law enforcement, striving to substantially reduce drug-related crime and addiction in the Yellowstone County community.

Activity: Identify crisis referral pathways supporting prenatal to age 26

Priority # Priority #3

Strategy # Strategy #5

Activity # Activity #21

Project Summary:

Conducted intercept mapping and identified the existing or needed referral sources and connections.

The information was organized and disseminated to the appropriate stakeholders.

Goal, Strategy & Anticipated Outcome

By conducting the intercept mapping and gathering of perspective via youth engagement, the team has identified referral and service pathways.

The Substance Abuse Connect website contains a resource tab and links to social media messaging. MT211 is a key tool as well, with updates and maintenance being a priority moving forward.

In order to have a robust pathway, youth crisis partners may need to be further engaged in this effort.
